Piotr Sierant

Junior React Developer

My interest in programming began very early in my life - when I was still in technical school. In class we would create simple softwares in C ++ and Java as well as websites.
I started taking deeper interest in programming in 2021 while writing Python programs. However, it took me no time to embark on a journey to deepen my knowledge of web applications.

Portfolio

FoodApp

Application for saving recipes. Thanks to the connection with the API, it is possible to display a random recipe. All added recipes are displayed in one place. I invite you to the live application: https://foodapp-sierant.vercel.app/
Technologies used: **React**, **SASS, JSON-Server**, **React-router-dom, Supabase, Vercel .**

PortfolioWeb

A page presenting my experience, skills and also about my person. I invite you to the live page: https://piotrsierant.github.io/portfolioWeb/
Technologies used: **HTML5, SASS, JavaScript, Webpack, Babel**

BestShop

Fully responsive website. The project is fully reproduced from the project posted on Adobe XD. Invites you to the live page: https://piotrsierant.github.io/BestShop/
Technologies used: **HTML5, SASS, Gulp**

Other project

Other completed projects and exercises:
Studying TypeScript and NextJS,, Calculator, form validation, CodeWars, CodeSignal, other

How do I want to develop further?

I want to develop in **React** technology, expand my stack with **TypeScript**. Further development is also provided by the next part of the **CodersLab course**.

Skills, courses

English

Level B1

Course

Certified JavaScript Developer course at CodersLab.

Knowledge of technology and tools

React, **JavaScript**, SASS, HTML5, CSS3, Gulp, Webpack, Git, Python, Photoshop, Corel, Adobe XD

Education

2012 –2016
4 years

Zespół Szkół Elektrycznych nr 1
im. Powstańców Śląskich w Krakowie

Field of study: IT Technician

Experience

2016 – 2021

Printer DTG, FHU MARKO MAREK STAWARZ

Designing gadgets, graphic designs, implementation of graphic designs, visualizations for clients, sublimation printing, uv, dtg, plotter service.

Hobby

From an early age I have been involved in sports, already in the second elementary grade my parents took me to football training at a local club where I systematically attended classes and league matches. A bit later, it was time for the gym and muay thai. Due to my travels abroad, my sports passions have gone aside and they have been replaced by personal development. I spend most of my free time learning programming and I am also tutoring English. I like traveling in the form of weekend getaways, city sightseeing or hiking in the mountains.

Processing of personal data

Useful skills

1. Knowledge of agile methodologies **Scrum** and **Agile**.
2. Ability to work in a team using **Git** and **GitFlow**.
3. Organization of work.
